Company description:

RentalMiles is a property and loyalty rewards management business. Our ecosystem is designed as a 100% digital platform managed through Apps & Websites and supported by a Global Concierge. Global Concierge puts a Concierge at the front door of every tenant and provides services to them that Independent Landlords (ILLS) rarely can. The Concierge also has the effect of removing many processes and tasks that distract professional Agents and take their time away from landlords and tenants e.g. maintenance tasks are outsourced and are not performed by RentalMiles.

RENTALMILES™
PROFESSIONAL PROPERTY MANAGEMENT

At RentalMiles we believe in the rights of landlords & tenants and seek to reward both parties significantly for good behaviours. Our clients' status increases the longer they stay with us, as do their earning rates for loyalty rewards. We use data intelligently so that tenants are encouraged to stay within the RentalMiles family and don't start from scratch each time they rent. The behaviours we reward also benefit the landlord, so we've tried to create a new industry culture within residential property management, one where all parties benefit.

At RentalMiles we seek to Make Homes More Rewarding. Our goal is to secure 2% of the North American ILLS market, managing 250,000 properties. And we want to share in the success of that growth by offering employees Ordinary Shares as part of their employment.

As rent is such a big component of daily spend, and we reward both parties, RentalMiles believes it is capable of generating a new category of loyalty reward. This category is likely to be 10-20X larger than any other spend category currently rewarded. Hence our ultimate vision is to create a Rewards Exchange that creates better value outcomes for all members of our ecosystem. In addition, and after continued evolution of our Digital platform, RentalMiles intends to use tokenization to simply leasing further, digitize titles & contracts, and then enter the Real Estate Sales market.

Thanks for your interest in joining us. We have a culture of executing disruptive strategy whilst acting professionally at all times. We want to have fun while we embark on this journey and part of all of us having fun is to abide by a set of common standards and policies.

We look forward to meeting with you!
